

Open Source Digital Infrastructure for Verifiable Open Credentials

Pronounced \ dī-vōk \

SHARED VISION

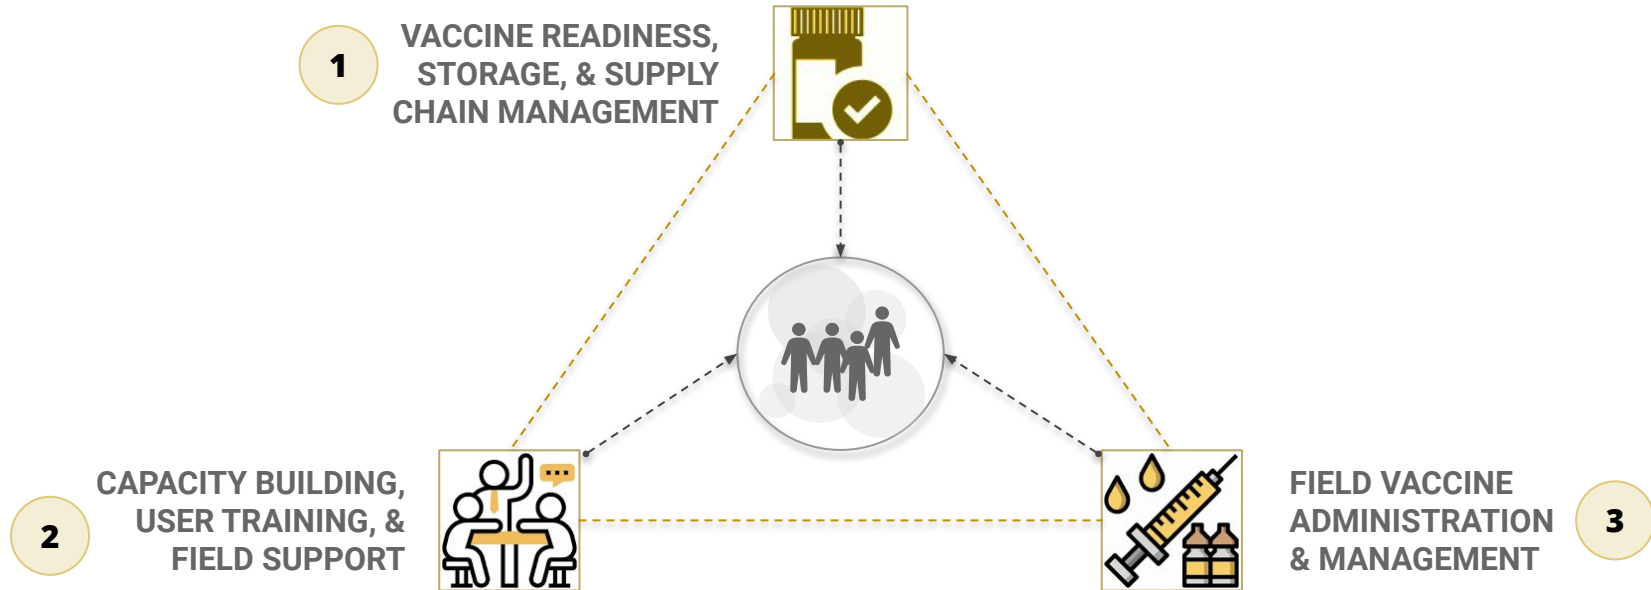

Enable countries to digitally orchestrate
large scale vaccination certification programs
using open source digital infrastructure as a public good.

WE EXPECT 3 PHASES

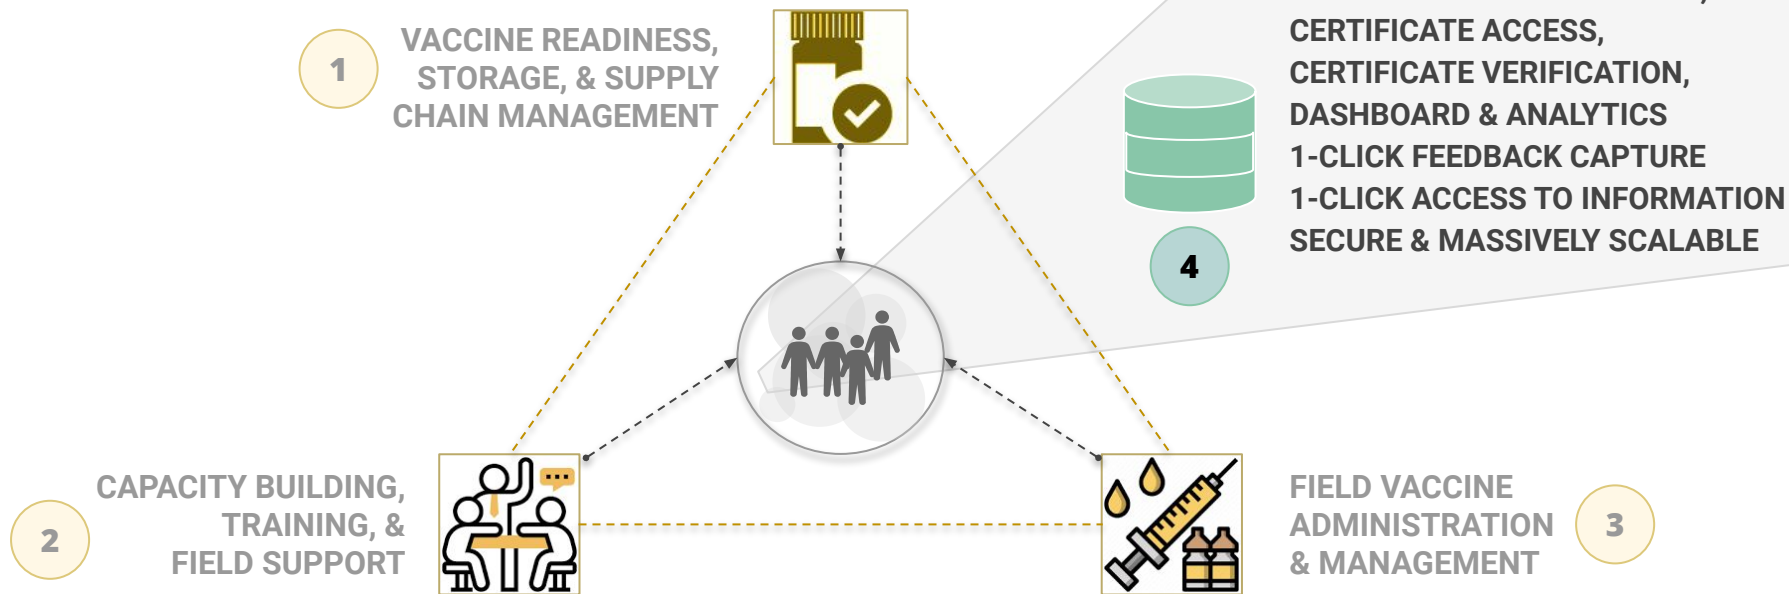

Infrastructure should seamlessly allow these transitions

Large scale vaccination needs multiple systems interplaying seamlessly and orchestrated digitally

A digitally verifiable vaccination certificate is critical to open up economy and countries can also use this to launch their immunization certificate registry

DIVOC

COUNTRIES NEED

An approach that works at scale (10 million vaccinations/day) and scales what works (choice of vaccines, process improvements, etc.)

An elastic system (from 10,000 vaccinations a day to 10 million a day)

Digital first design that is evolvable

A system which is agile and responsive

Real time observability is key through telemetry and analytics

DIVOC is a flexible & extendable software ----- use across multiple programs, contexts, geographies

that helps countries to digitally orchestrate ----- facilities, programs, vaccines across regions

large scale vaccination certification ----- digital certificate issuance, access, and management

using open source technologies ----- built in India for the world as a digital public good

that is standards driven, scalable, & secure ----- built for population scale using global standards

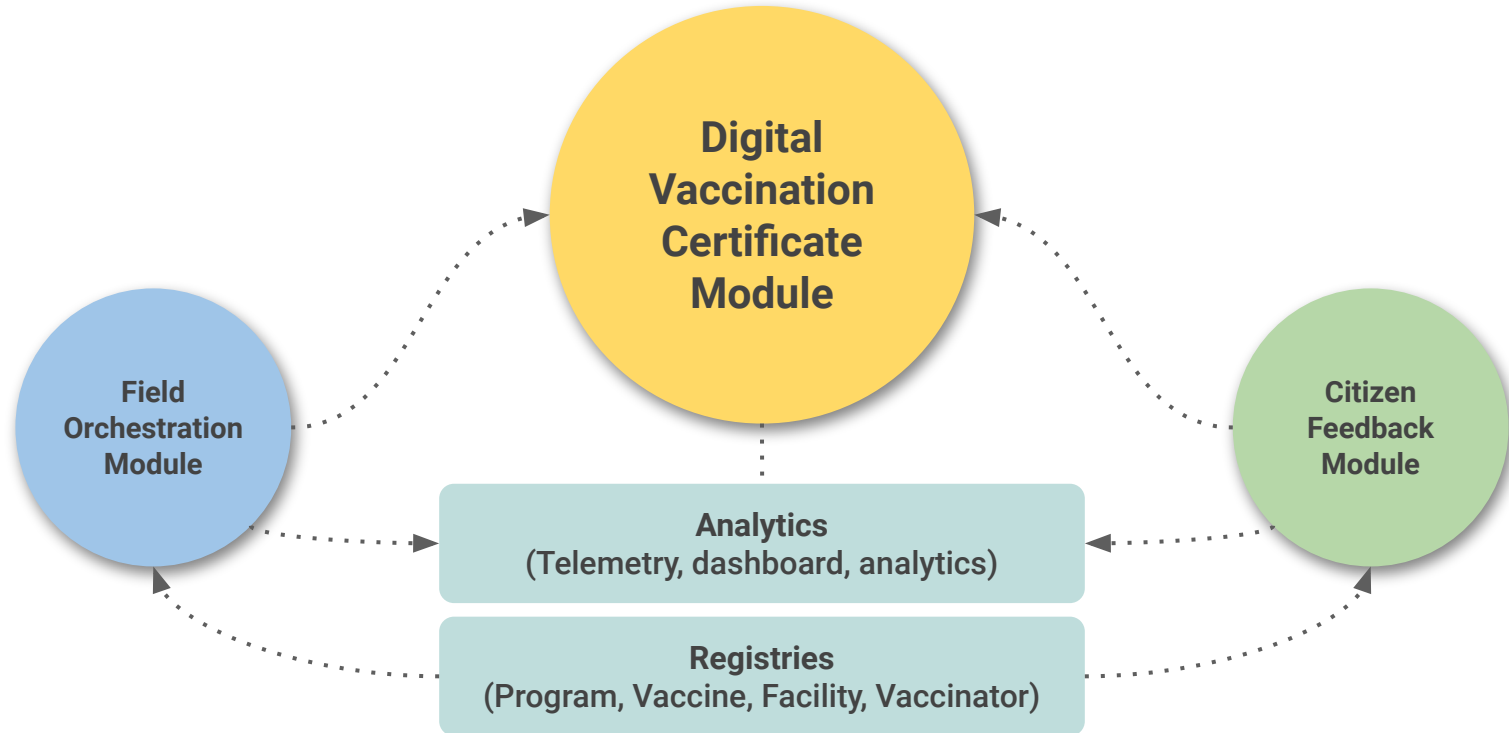

Guiding Principles

- **Versatile**
- **Allows for plug & play**
- **Trustworthy**
- **Citizen-centric approach**

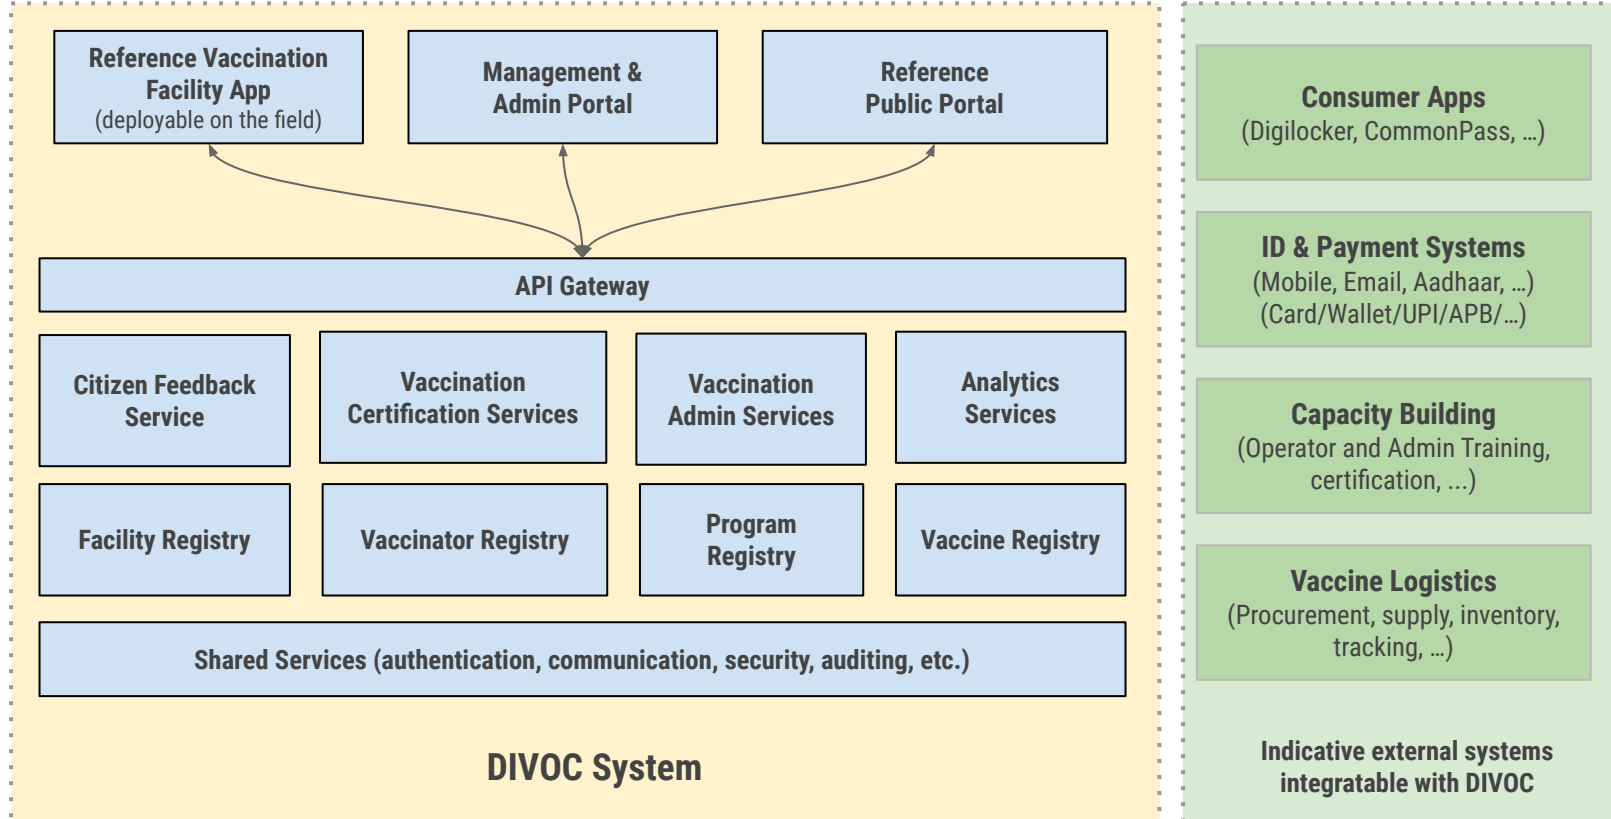

Architecture Principles

- **Micro-services & API based**
- **Interoperable**
- **Scalable**
- **Flexible & Configurable**
- **Observable**
- **Resilient**
- **Privacy & Security by design**
- **Open Standards**
- **Trustable**
- **Internationalizable**

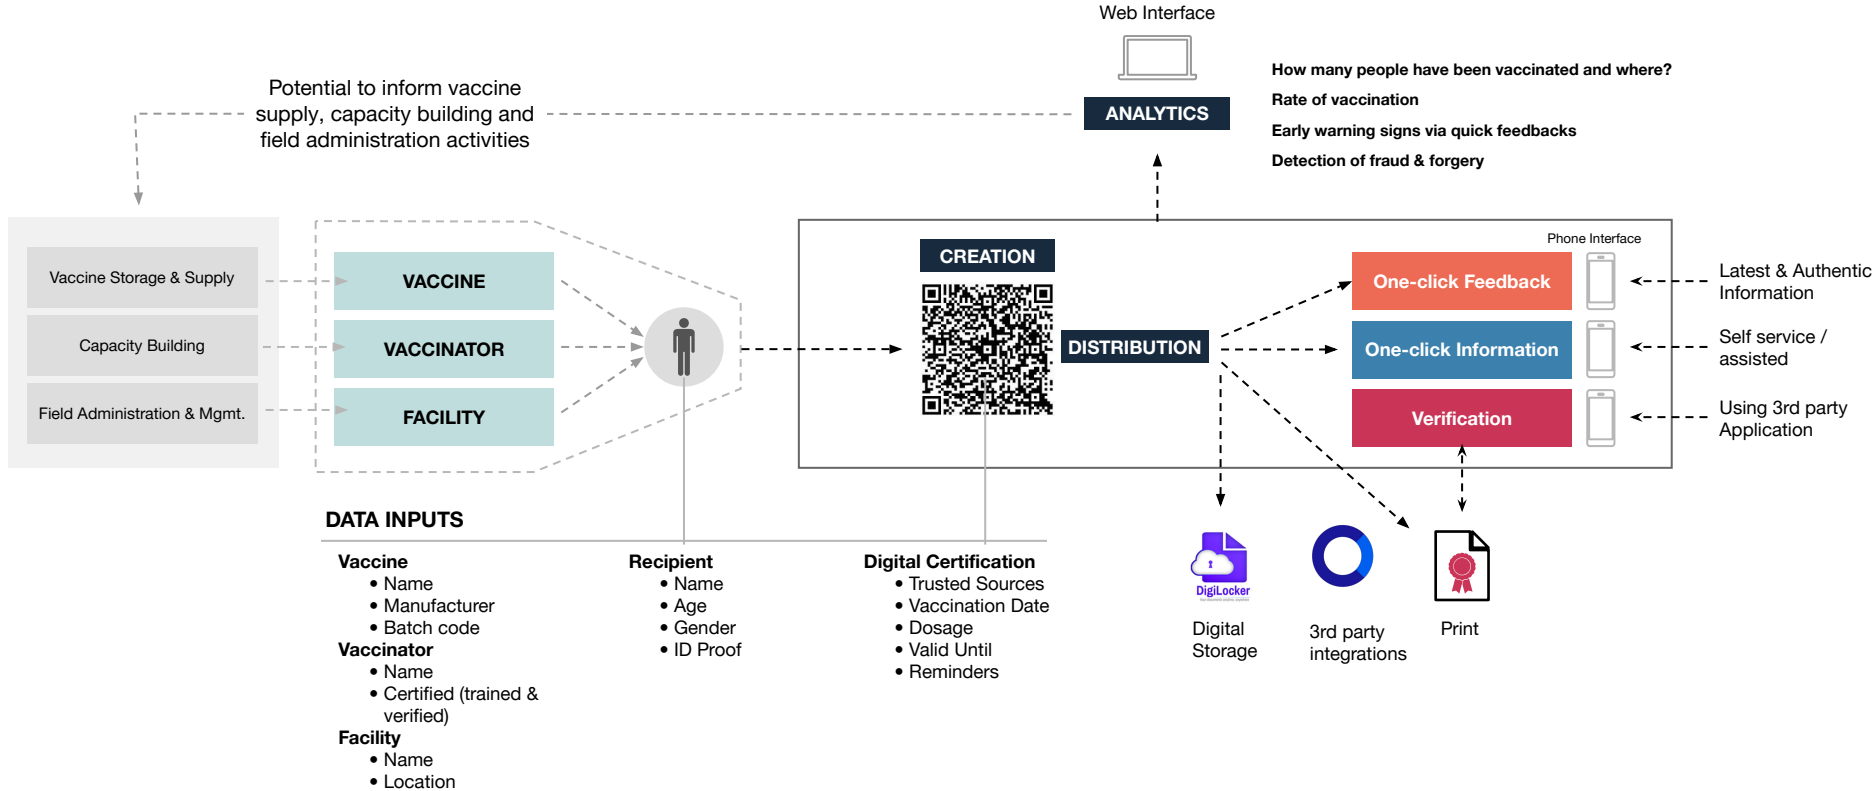

DIVOC consists of core certificate module and supporting modules
each of which can be used independently or together
and also integrated with other external systems

DIGITAL CERTIFICATE MODULE

VACCINATION CERTIFICATE

- Conforming to WHO/IHR guidelines* based on W3C verifiable credential* specifications
- Aligns with FHIR or ICD codifications.
- Authenticity verifiable via digitally signed QR code
- Available digitally on smartphone with QR code
- Printable for non-smartphone users
- Multilingual templates (for data and layout)
- Ability for users to download/print after vaccination either at facility or from home in self/assisted modes
- Integratable to health Lockers and certificate lockers
- Easy integration with immunization e-registry

Vaccination Certificate

टीकाकरण प्रमाण पत्र

Program Name / कार्यक्रम का नाम

Certificate ID / प्रमाणपत्र क्रमांक : 116357162
 Issue Date. / जारी करने की तिथि : 20-Dec-2020

Recipient's details / प्राप्तकर्ता का विवरण: 20-Dec-2020
 Name / नाम : Madhav P
 ID Details आईडी विवरण : Aadhaar # 1111 2222 3333
 Gender / लिंग : Male
 Age / उम्र : 26

Centre of Vaccination / टीकाकरण केंद्र : Awesome Hospital, Bengaluru
 बह्मन बड़िया अस्पताल, बेंगलुरु

Vaccine and Manufacturer / टीका और निर्माता : Covax19, Oxford

Date of Vaccination / टीकाकरण की तिथि : 20-Dec-2020

Vaccine Dose / टीका की खुराक : 1 of 2

Valid Until / वैधता : 20-Jun-2021

ENERGIZED VACCINATION CERTIFICATE

ONCE THE CERTIFICATE IS ISSUED, MULTI-CHANNEL DISTRIBUTION AND PRINT CAN BE ENABLED TO ENSURE INCLUSIVE ACCESS AND USAGE

HANDLING MULTIPLE DOSES AND REMINDERS

VACCINE REGISTRY

Approved vaccines

Active Status

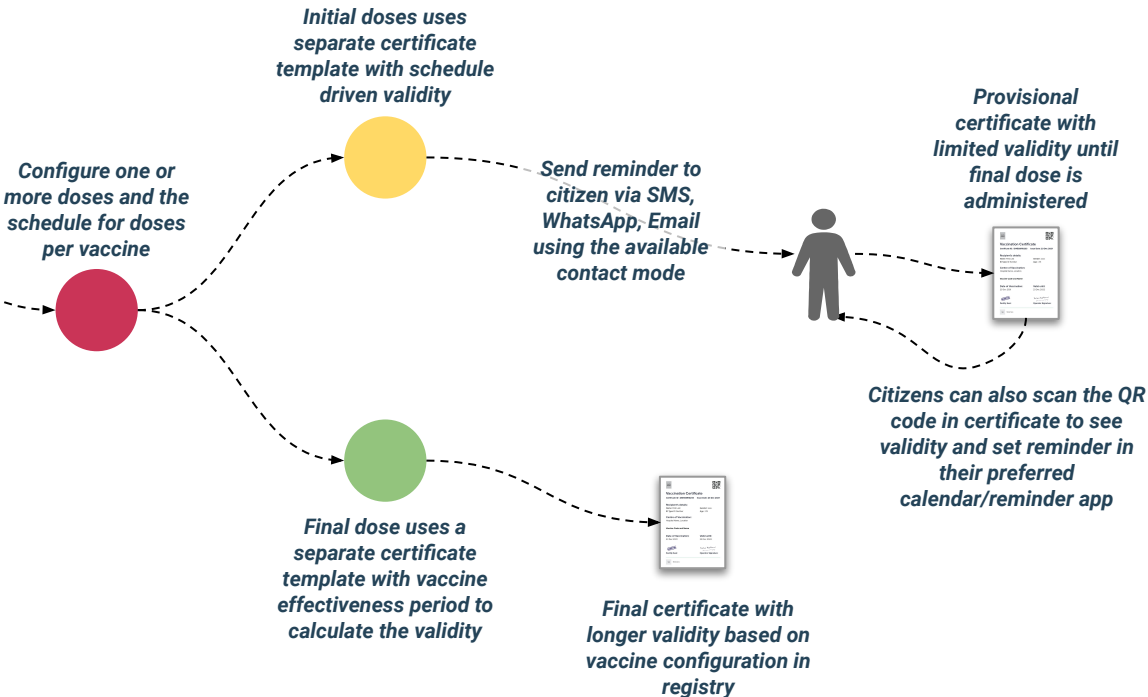

Vaccination schedule

Batch deny list

Max retail price

Filter Rule if any

Vaccination Method

BENEFITING ALL

For the individual

1. Proof of vaccination
2. Verify authenticity offline/online
3. Reminder for doses
4. Meet people, get back to work
5. Get info via QR code
6. Provide feedback via QR code

For the society

1. Opens up functions, meetings, businesses
2. Opens up economy
3. Track towards regional herd immunity

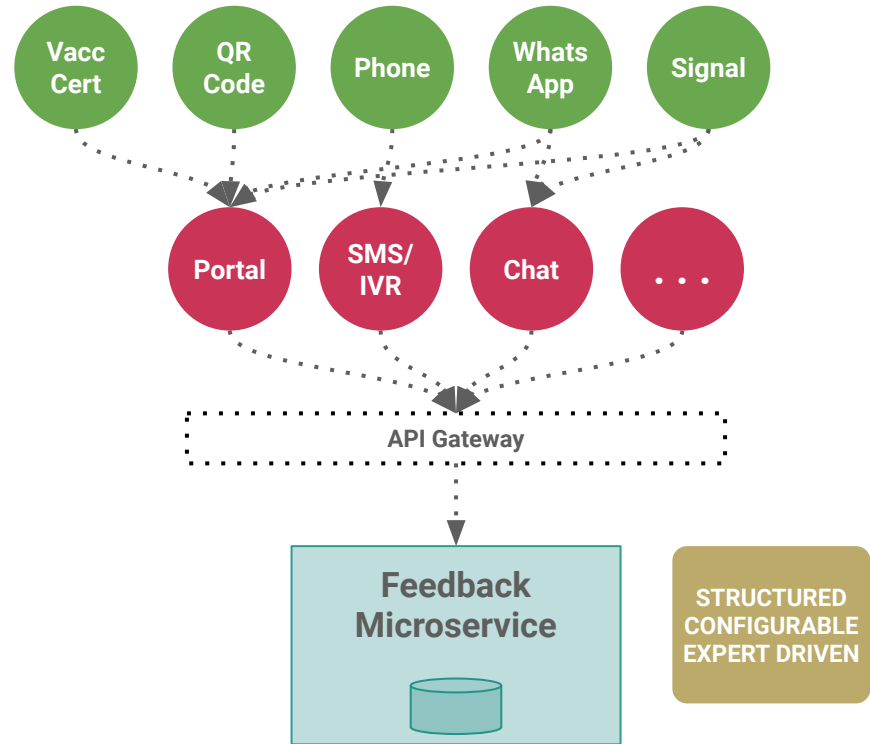

For the world

1. Open up travel, events
2. Opens up trade
3. Incorporate certificate into travel passes
4. Opens global economy.

CITIZEN FEEDBACK MODULE

POST VACCINATION FEEDBACK

- **Structured feedback**
 - Configurable, expert driven
- **Feedback Types**
 - Vaccination response feedback
 - Facility/Vaccinator rating & feedback
- **Multi channel, multi-lingual**
 - Public portal, inbound sms, IVR, WhatsApp, other apps via API
 - Multiple languages
- **Self service and assisted modes**
- **Integratable with AEFI systems and processes.**

FIELD ORCHESTRATION MODULE

ORCHESTRATION CONTROLS

USING REGISTRIES

PROGRAM REGISTRY

Programs that are
being rolled out

Active Status

Allowed vaccines

Start and end dates

Certificate Templates

VACCINE REGISTRY

Approved vaccines

Active Status

Vaccination schedule

Batch deny list

Max retail price

Filter Rule if any

Vaccination Method

FACILITY REGISTRY

Approved facilities

Location (state, district,
postal code)

Active Status

Vaccination daily rate

Max vaccination
stations

Total supply (if available)

Rating & feedback

VACCINATOR REGISTRY

Trained vaccinators

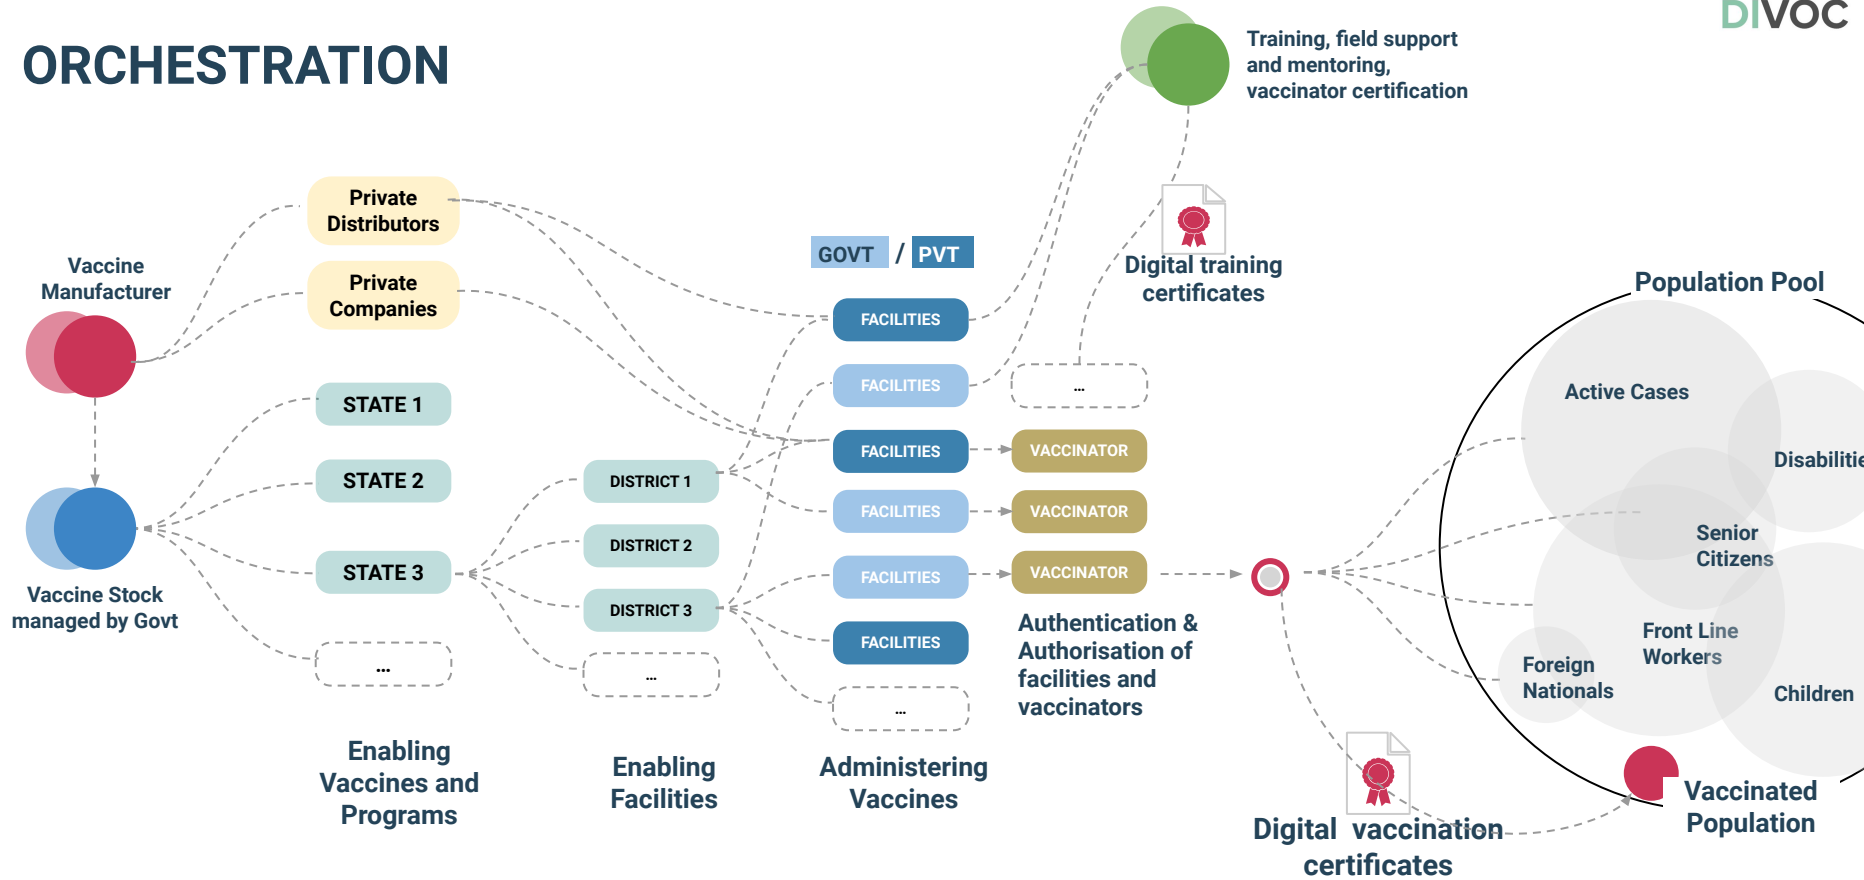

Active Status

Training certificate

Associated facilities

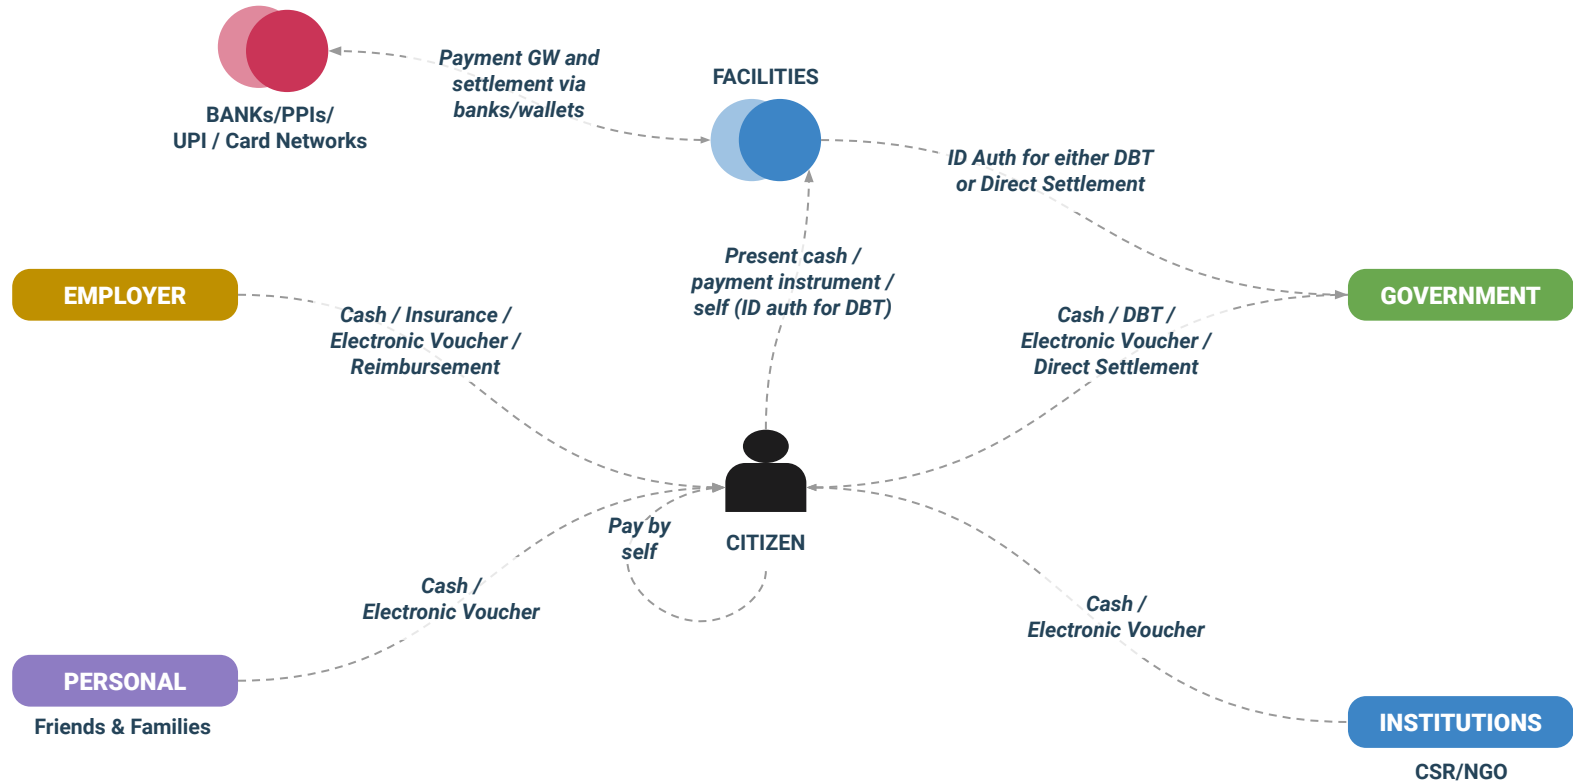

Rating & feedback

ORCHESTRATION

A platform to orchestrate the complexity within an ecosystem of diverse players to administer a vaccine program across the country successfully.

LEVERAGING MULTIPLE PAYMENT MECHANISMS

**An open source, global digital public good
From the team who have built population scale platforms**

**DIVOC ENABLES COUNTRIES TO EASILY BUILD DIGITAL CERTIFICATE INFRA FOR
VACCINATION AND OTHER PROGRAMS**

along with other optional supporting modules,
integrate with existing systems, extend it, and use it freely.
